

Lab exercise 1

- Install phpunit into your linux home directory and check that it's working successfully.

Lab exercise 2

- Write a factorial function, `factorial($n)`
- Tests:
 - `factorial(0)` should be 1.
 - `factorial(1)` should be 1.
 - `factorial(5)` should be 120.
 - Factorial of any random int, $n > 3$ should be equal to factorial of $n-1$ multiplied by n .
 - Factorial of -3 should be null.
 - Factorial of 1.5 should be null.
 - Factorial of false should be null.
 - Factorial of 'abc' should be null.
